引文與參考書目

Introduction

Citation-引文(註)

According to traditional Chinese medicine, the pericardial meridian is associated with the pain or fullness in the chest, palpitations, depression, restlessness, manic or depressive disorders, nausea or vomiting, hiccups, gastric pain, and distension in the upper abdomen (Bai and Baron, 2001). Since the parasympathetic modulation of both heart and gut is largely mediated by the vagus nerve, and since vagal stimulation of the gut can result in increased peristalsis while the vagal stimulation of the heart can result in decreased heart rate (Guyton and Hall, 1996), it is speculated that to some extent the pericardium meridian might be associated with the autonomic nervous modulation of the subject.

Acupuncture or acupressure at the Neiguan (P6) point, the most frequently used acupoint in the pericardium meridian, has been shown to lessen nausea and vomiting (Dundee *et al.*, 1987, 1988, 1989a and b; Ho *et al.*, 1989; De Aloysio and Penacchioni, 1992; Belluomini *et al.*, 1994; Fan *et al.*, 1997; Harmon *et al.*, 2000). Because nausea and vomiting are also related to autonomic nervous activity (Morrow *et al.*, 1992; Morrow *et al.*, 1999), we speculated that the autonomic nervous activity might be changed when acupuncture at the P6 point was performed.

Heart rate variability analysis is a useful non-invasive method for the assessment of autonomic nervous modulation of heart rate. Some diseases are associated with vagal modulation, and the restoration of vagal modulation is associated with the improvement

功用

- 加強/支持內容信度
- 避免抄襲疑慮
- 作為同主題資料參考依據

SUPPLEMENTARY INFORMATION

doi:10.1038/nature20584

Supplementary table 1 | Equations describing the 'Likely water' cluster hull and cluster overlaps in the multidimensional feature-space.

These equations describe the 'Likely water' cluster in the multidimensional feature-space. By definition, part of this cluster contain pixels that are not water, and request additional processing steps to be properly assigned. The method section provides details about the usages of this equations within the expert system classifier.

Name	Description	Equations describing the "Likely water" cluster hull and cluster overlaps in the multidimensional feature-space
water1	Water cluster where NDVI < 0	$b('value') < 0.62 \&\& (((b('hue') < (-9.867784585617413 * b('nd')) + 238.26034242940045)) \&\& (b('hue') > (-12960.000000000335 * b('nd')) - 12714.048607819708)) \&\& (b('hue') > (23.627546071775214 * b('nd')) + 255.53176874753507)) \vee (((b('hue') < (-54.685799109352004 * b('nd')) + 215.15052322834936)) \&\& (b('hue') < (23.627546071775214 * b('nd')) + 255.53176874753507)) \&\& (b('hue') > (-7.321079389910027 * b('nd')) + 224.6166270396205)) \vee (((b('hue') < (-172.0408163265306 * b('nd')) + 191.69646750224035)) \&\& (b('hue') < (-$

Introduction

Citation-引文(註)

According to traditional Chinese medicine, the pericardial meridian is associated with the pain or fullness in the chest, palpitations, depression, restlessness, manic or depressive disorders, nausea or vomiting, hiccups, gastric pain, and distension in the upper abdomen (Bai and Baron, 2001). Since the parasympathetic modulation of both heart and gut is largely mediated by the vagus nerve, and since vagal stimulation of the gut can result in increased peristalsis while the vagal stimulation of the heart can result in decreased heart rate (Guyton and Hall, 1996), it is speculated that to some extent the pericardium meridian might be associated with the autonomic nervous modulation of the subject.

Acupuncture or acupressure at the Neiguan (P6) point, the most frequently used acupoint in the pericardium meridian, has been shown to lessen nausea and vomiting (Dundee *et al.*, 1987, 1988, 1989a and b; Ho *et al.*, 1989; De Aloysio and Penacchioni, 1992; Belluomini *et al.*, 1994; Fan *et al.*, 1997; Harmon *et al.*, 2000). Because nausea and vomiting are also related to autonomic nervous activity (Morrow *et al.*, 1992; Morrow *et al.*, 1999), we speculated that the autonomic nervous activity might be changed when acupuncture at the P6 point was performed.

Heart rate variability analysis is a useful non-invasive method for the assessment of autonomic nervous modulation of heart rate. Some diseases are associated with vagal modulation, and the restoration of vagal modulation is associated with improvement

██████████ would like to share an EndNote library with you.

To accept this invitation and access Jamie 's library, you must have EndNote X7.2 or later installed, and we strongly recommend using EndNote 20 for the best experience.

Once you've accepted this invitation, you will be able to access all of the references, PDFs, file attachments, and notes in this shared library from your EndNote desktop application.

Accept: <https://account.endnote.com/enwservices/invitation/#/f252b9dd-2e25-4640-8443-10dfc69ff700>

Don't have EndNote for desktop? Get the free trial version now to access shared libraries and much more. http://endnote.com/buy?utm_source=en-desktop&utm_medium=edm&utm_campaign=ls-email-ro&utm_content=buy-en

透過連結進入

Learn more about sharing your research with EndNote. http://endnote.com/?utm_source=en-desktop&utm_medium=edm&utm_campaign=ls-email-ro&utm_content=learn-more

If you do not wish to accept this invitation, please notify ██████████ directly.

Jamie has invited you to join a shared
EndNote library.

[Learn More](#)

To accept this invitation, sign in using the same credentials you use when accessing EndNote online or syncing your desktop library, or create a new account. To access this shared library you must have EndNote X7.2 or later installed.

完成邀請接受，即可使用

Invitation accepted. For access to Jamie's shared EndNote library, follow these instructions.

Share Library 使用方式

Update EndNote to version X7.2 or later

Now, go to the desktop to make sure you're on the latest version. To check:

Windows

1. Click on **Help > About**
2. Click on **Program Updates** or download the [installer](#).

You can now access the shared library from your desktop.
Just go to File > Open Shared Library.

OS X

1. Click on the **EndNote** menu dropdown.
2. Click on **Check for Updates** or download the [installer](#).

You can now access the shared library from your desktop.
Just go to File > Open Shared Library.

Fears of second coronavirus outbreak hit global shares

Chapter 1

Share prices had gained in recent weeks amid hopes that the economy would rebound as authorities loosened restrictions put in place to try to slow the spread of the virus.(Bagheri et al., 2021; Silva et al., 2020)

Last week's surprise report showing US employers had restarted hiring in May helped to push the tech-heavy Nasdaq index to new highs(Haibo et al., 2020; Sharma et al., 2020).

But the recovery remains tentative. On Thursday, the US Labor Department reported that another 1.5 million people had filed new unemployment claims last week. More than 30 million continue to collect the benefits, it said.

摘要

BackgroundAlthough people of all ages are susceptible to the novel coronavirus infection, which is presently named "Coronavirus Disease 2019" (COVID-19), there has been relatively few cases reported among children. Therefore, it is necessary to understand the clinical characteristics of COVID-19 in children and the differences from adults. Case presentationWe report one pediatric case of COVID-19. A 14-month-old boy was admitted to the hospital with a symptom of fever, and was diagnosed with a mild form of COVID-19. The child's mother and grandmother also tested positive for SARS-CoV-2 RNA. However, the lymphocyte counts were normal. The chest computed tomography (CT) revealed scattered ground glass opacities in the right lower lobe close to the pleura and resorption after the treatment. The patient continued to test positive for SARS-CoV-2 RNA in the nasopharyngeal swabs and stool at 17days after the disappearance of symptoms. ConclusionThe present pediatric case of COVID-19 was acquired through household transmission, and the symptoms were mild. Lymphocyte counts did not significantly decrease. The RNA of SARS-CoV-2 in stool and nasopharyngeal swabs remained positive for an extended period of time after the disappearance of symptoms. This suggests that attention should be given to the potential contagiousness of pediatric COVID-19 cases after clinical recovery.

Human and novel coronavirus infections in children: a review

[Rajapakse, N](#) and [Dixit, D](#)

Jan 2 2021 | Jun 2020 (早期取閱) | [PAEDIATRICS AND INTERNATIONAL CHILD HEALTH](#) 41 (1) , pp.36-55

Coronaviruses, seven of which are known to infect humans, can cause a spectrum of clinical presentations ranging from asymptomatic infection to severe illness and death. Four human coronaviruses (hCoVs)-229E, HKU1, NL63 and OC43-circulate globally, commonly infect children and typically cause mild upper respiratory tract infections. Three novel coronaviruses of zoonotic origin ha' ... [顯示更多](#)

2019 Novel Coronavirus Infection in Children and Infants: Where We Are and What We Know?

[Deravi, N](#); [Yaghoobpoor, S](#); (...); [Vaezjalali, M](#)

Oct 2020 | [ARCHIVES OF CLINICAL INFECTIOUS DISEASES](#) 15 (5)

Since the outbreak of coronavirus disease 2019 (COVID-19), in Wuhan, China, there were more than 10,021,401 confirmed infected cases. This infection has spread to almost all countries around the world with reported high mortality and morbidity. Infections in children and infants have been reported as well. The condition of the infected children was mostly mild. To date, there have been ... [顯示更多](#)
